Do not touch the product with a wet hand. Do not pull the lead cable. It may cause product breakdown or an electric shock.

Part Description

Part Description

Remote temperature sensor can be installed any place a user wants to detect the temperature.

⚠ CAUTION

Remote temperature sensor only applied to Cassette and Duct Products.

Remote Sensor

Parts

Installation Method

Installation Method

How to use

1 After deciding where the remote temperature sensor is installed, decide the location and height of the fixing screws. (Interval between the screws : 60mm)

2 After removing the panel of the indoor unit, remove the room temperature sensor in CN-ROOM of its main PCB.

Installation Method

3 Insert the connector of the connection wire into the space for the connector in place of the room temperature sensor.

4 In case that a wire remote control is installed, select the slide switch of the temperature detection on the back of the wire remote control to the Indoor Unit.

Installation Method

How to connect the remote temperature sensor and the connection wire

The Connection wire does not matter if you change the color of the wire because of non-polar

How to install the remote temperature sensor on the wall

Integrate the remote temperature sensor with the screws as the order of arrows.

Fixing the Remote Sensor

⚠ CAUTION

1. Choose the place where the average temperature can be measured for the place the indoor unit operates.
2. Avoid direct sunlight.
3. Choose the place where the cooling/heating devices do not affect the remote sensor.
4. Choose the place where the outlet of the cooling fan do not affect the remote sensor.
5. Choose the place where the remote sensor isn't affected when door is open.
